amira karam

Certified Oracle Apex Developer at Financial Regulatory Authority
FRA | ISTQB® (CTFL) | SFC™ | SFPC™

Cairo, Egypt

Summary

I am actively seeking a position as an Oracle APEX developer where I can leverage my skills in designing, developing, and testing robust applications. With a strong foundation in programming languages, database management, and a keen eye for detail, I am eager to contribute to innovative projects and play a key role in ensuring the seamless functionality of technical solutions. My passion for problem-solving and dedication to producing high-quality software align perfectly with the challenges and opportunities in the field. I look forward to bringing my expertise to a dynamic team and making meaningful contributions to the success of projects and the overall growth of the organization

Experience

Financial Regulatory Authority FRA

6 years 10 months

Oracle Apex Developer

January 2019 - Present (6 years 4 months)

cairo

Application Development:

Design, develop, and maintain Oracle APEX applications based on business requirements.

Create and customize interactive reports, forms, and charts within the Oracle APEX environment.

Implement security measures to protect sensitive data within applications.

Database Design and Development:

Utilize SQL and PL/SQL to design and implement database structures.

Optimize database performance and ensure efficient data retrieval and storage.

Work with database administrators to ensure the integrity and security of the database.

Collaboration and Communication:

Collaborate with cross-functional teams, including business analysts, project managers, and other developers.

Communicate effectively with stakeholders to gather and understand business requirements.

Testing and Debugging:

Conduct thorough testing of applications to identify and resolve any bugs or issues.

Debug and troubleshoot problems in existing applications to ensure smooth functionality.

Documentation:

Create and maintain documentation for application design, development, and deployment processes.

Document code and development procedures to facilitate knowledge transfer and team collaboration.

Performance Optimization:

Identify opportunities for performance improvement and implement enhancements to optimize application speed and responsiveness.

User Training and Support:

Provide training and support to end-users on how to use and navigate Oracle APEX applications.

Address user inquiries and troubleshoot issues related to application usage.
